Subject: RE: Request for data update to the OECD eChemPortal from US EPA IRIS
Attachments: eChem IRIS Data Update 2015.doc; IRIS eChem Portal_160809.xlsx

Hello Valerie,

My apologies for taking so long to get back to you on this. IRIS has undergone a substantial change in the platform/structure of the website and we wanted to capture as much of that as possible. So please remove all current entries and replace with the information in this new attachment. We have replaced html pages (IRIS Summary) as PDFs and now have chemical specific dynamic pages that link meetings, assessment update schedules, documents, toxicity values and other related information together much better than the previous site. If you have any questions or need any more information about the new IRIS website please don't hesitate to reach out. I also have removed Jamie Lawson, he has left EPA, and included Vincent Cogliano, the new IRIS Director. Please copy both of us on any future updates.

Maureen Johnson

Subject: Request for data update to the OECD eChemPortal from US EPA IRIS
Importance: High

To: eChemPortal Contact Points (contacts for data sources participating in the eChemPortal project)

Dear M Lawson and Johnson,

In order to keep eChemPortal as current as possible, eChemPortal Contact Points are invited to submit data updates as often as possible. If your database has been updated since last time, the Secretariat invites you to send data updates of your database for eChemPortal **by 15 July 2016** or as soon as possible.

If, we would like you to send us a **complete index** for the chemicals for which there are assays. Please do not hesitate to split the file so that it is not too large and difficult to work on. Besides, we would welcome a separate/different index file with all your chemicals (having data or not), also split if necessary. You will find in attachment the template detailing the format for the index files. If you have any questions please do not hesitate to contact me.

In addition, the secretariat would like to keep your efforts to participate in the eChemPortal project as low as possible. Please let us know whether there are ways to facilitate submission of your data which we can consider in the future.

Best regards,

Valérie
